ELECTRIFICATION AND HYBRIDATION OF SHIPS AND WORKBOATS

With a growing pressure to get **ships** and **boats** **cleaner** by all means, the **architecture** of the **propulsion powertrain** becomes **key** in defining ships for **tomorrow**.

We are specialized in **full electric, hybrid** propulsion with different technologies of **batteries, motors** and **fuels**.

With the newest progress of industrial sailing systems for cargo ships, we can answer your question related to **fuel reduction, deck interface systems, safety management** and more...

We can perform our
SERVICES

all over Europe on 

For **other countries**,
please send your request by
